

Your first C++ program

- . First C++ program
- . Introduce comments
- . Introduce errors and warnings.
- . Statements and functions
- . Coding conventions. We'll go with snake case.
- . Showcase walking through the program with a debugger

Your first C++ program

```
// One line comment
import utilities;

/*
    This is a block comment that englobes multiple
    lines of text
*/

int main()
{

    // This is going to print Number1, Number2 and Number3.
    print_msg("Number1");
    print_msg("Number2");
    print_msg("Number3");
    print_number(5);

    int num1 = 5;
    int num2 = 6;
    int result = add_numbers(num1, num2);
    print_number(result);
    return 0;
}
```
